| Application                | ELISA                                                                                                                                                                                                                                        |
| Species Reactivity         | Human                                                                                                                                                                                                                                        |
| Product Description        | Human Eph Receptor B2 ELISA Kit is a sandwich Enzyme-Linked Immunosorbent Assay (sELISA) designed for the in vitro quantitative determination of human Eph Receptor B2 in serum, plasma, tissue homogenates, and other biological fluids.... |
| Range                      | 0.625-40 ng/ml                                                                                                                                                                                                                               |
| Sensitivity                | 0.375 ng/ml                                                                                                                                                                                                                                  |
| Samples                    | Serum, plasma, tissue homogenates, and other biological fluids.                                                                                                                                                                              |
| Target                     | Eph Receptor B2                                                                                                                                                                                                                              |
