| Application                | ELISA                                                                                                                                                                                                                                                          |
| Species Reactivity         | Human                                                                                                                                                                                                                                                          |
| Product Description        | Human Monoamine Oxidase A/MAO-A ELISA Kit is a sandwich Enzyme-Linked Immunosorbent Assay (sELISA) designed for the in vitro quantitative determination of human Monoamine Oxidase A/MAO-A in serum, plasma, tissue homogenates, and other biological fluid... |
| Range                      | 15.625-1000 pg/ml                                                                                                                                                                                                                                              |
| Sensitivity                | 9.375 pg/ml                                                                                                                                                                                                                                                    |
| Samples                    | Serum, plasma, tissue homogenates, and other biological fluids.                                                                                                                                                                                                |
| Target                     | Monoamine Oxidase A/MAO-A                                                                                                                                                                                                                                      |
