| Product Description        | PKCB (phospho Ser661) Cell-Based ELISA Kit is a Enzyme-Linked Immunosorbent Assay designed for the indirect in vitro quantitative determination of PKC beta levels in adherent and suspension cells.... |
| Range                      | > 5000 Cells                                                                                                                                                                                            |
| Samples                    | Adherent and suspension cells.                                                                                                                                                                          |
| Target                     | PKC beta                                                                                                                                                                                                |
