| Product Description        | Retinoblastoma (phospho Ser608) Cell-Based ELISA Kit is a Enzyme-Linked Immunosorbent Assay designed for the indirect in vitro quantitative determination of Rb levels in adherent and suspension cells.... |
| Range                      | > 5000 Cells                                                                                                                                                                                                |
| Samples                    | Adherent and suspension cells.                                                                                                                                                                              |
| Target                     | Rb                                                                                                                                                                                                          |
