| Category                   | Kits/Assays                                                                                                                                                                                                      |
| Application                | ELISA                                                                                                                                                                                                            |
| Species Reactivity         | Human, Mouse, Rat                                                                                                                                                                                                |
| Product Description        | DNA Polymerase beta Cell-Based ELISA Kit is a Enzyme-Linked Immunosorbent Assay designed for the indirect in vitro quantitative determination of DNA Polymerase beta levels in adherent and suspension cells.... |
| Range                      | > 5000 Cells                                                                                                                                                                                                     |
| Samples                    | Adherent and suspension cells.                                                                                                                                                                                   |
| Target                     | DNA Polymerase beta                                                                                                                                                                                              |
