| Product Description        | This GENLISA Rat Alpha-Melanocyte Stimulating Hormone (AMSH) ELISA includes features like: - Ready to use protocol with break-apart wells for ease of use - Standardisation and High Reproducibility - Lot to Lot Consistency - Accuracy and Precision Val... |
| Range                      | 123.5 - 10000 pg/ml                                                                                                                                                                                                                                           |
| Sensitivity                | 51.9 pg/ml                                                                                                                                                                                                                                                    |
| Samples                    | Serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids.                                                                                                                                                         |
