| Species Reactivity         | Human                                                                                                                                                                                                                                                         |
| Product Description        | This ELISA kit uses the Competitive-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with Human AP36. During the reaction, Human AP36 in the sample or standard competes with a fixed amount of Human AP36 on the solid pha... |
| Range                      | 7.41-600pg/mL                                                                                                                                                                                                                                                 |
| Sensitivity                | 2.52pg/mL                                                                                                                                                                                                                                                     |
| Samples                    | Serum,plasma and other biological fluids                                                                                                                                                                                                                      |
| Target                     | AP36                                                                                                                                                                                                                                                          |
