| Category                   | Kits/Assays                                                                                                                                                                                                                                                   |
| Species Reactivity         | Mouse                                                                                                                                                                                                                                                         |
| Product Description        | This ELISA kit uses the Competitive-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with Mouse PIICP. During the reaction, Mouse PIICP in the sample or standard competes with a fixed amount of Mouse PIICP on the solid ... |
| Range                      | 2.47-200ng/mL                                                                                                                                                                                                                                                 |
| Sensitivity                | 0.93ng/mL                                                                                                                                                                                                                                                     |
| Samples                    | Serum,plasma and other biological fluids                                                                                                                                                                                                                      |
| Target                     | PIICP                                                                                                                                                                                                                                                         |
