| Buffer                     | Buffer: 0.01M Sodium Phosphate, 0.25M NaCl, pH 7.6. Stabilizer: 15 mg/ml Bovine Serum Albumin (IgG-Free, Protease-Free).<br>Preservative: None (Warning: Use of sodium azide as a preservative will substantially inhibit the enzyme activity of horseradish... |

|                    |                                                                                                                                                                                                                                                               |
|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Purity             | The antibody was purified from antisera by a combination of pepsin digestion and immunoaffinity chromatography using antigens coupled to agarose beads. Fc fragments and whole IgG molecules have been removed.                                               |
| Form               | Freeze-dried solid                                                                                                                                                                                                                                            |
| Storage            | Storage and Rehydration: Store freeze-dried solid at 2-8°C. Rehydrate with the indicated volume of dH2O and centrifuge if not clear. Prepare working dilution on day of use. Product is stable for about 6 weeks at 2-8°C as an undiluted liquid. Extended... |
| Antibody Type      | Secondary Antibody                                                                                                                                                                                                                                            |
| Application Dilute | 1:500 - 1:5,000 for immunohisto/cytochemistry_x000D_ 1:5,000 - 1:100,000 for ELISA and Western blotting with chromogenic substrates_x000D_ 1:10,000 - 1:200,000 for Western blotting with ECL substrates_x000D_ Dilution factors are presented in the form... |
