| Manufacturer               | Echelon Biosciences                                                                                                                                                                                                                                           |
| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Product Description        | Acid ceramidase (aCDase) is a lysosomal amidase which hydrolyzes the acyl chain from ceramides forming sphingosine which is subsequently phosphorylated to the bioactive lipid sphingosine 1-phosphate. aCDase is upregulated in many cancer types such as... |
| Application Notes          | Categories: Biochemical Reagents. Related: Inhibitor, Sphingolipid.<br>Ship 1 : Shipping Temp. Ship 2: Ambient Temperature                                                                                                                                    |
