| Manufacturer               | Echelon Biosciences                                                                                                                                                                                                                                          |
| Category                   | Molekularbiologie                                                                                                                                                                                                                                            |
| Product Description        | Phosphoinositides (PIPs) are minor components of cellular membranes but are integral signaling molecules for cellular communication. Phosphatidylinositol 3,4,5-trisphosphate (PIP3), formed from PI(4,5)P2 though phosphorylation by PI 3-kinase, activa... |
| Application Notes          | Categories: Lipids. Related: Fluorescent, PI(3,4,5)P3. Ship 1 : Shipping Temp. Ship 2: Dry ice or gel ice depending on destination                                                                                                                           |
