| Product Description        | The nuclear lamina consists of a two-dimensional matrix of proteins located next to the inner nuclear membrane. The lamin family of proteins make up the matrix and are highly conserved in evolution. During mitosis, the lamina matrix is reversibly dis... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
