| Product Description        | Amylases are secreted proteins that hydrolyze 1,4-alpha-glucoside bonds in oligosaccharides and polysaccharides, and thus catalyze the first step in digestion of dietary starch and glycogen. The human genome has a cluster of several amylase genes tha... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
