Recombinant Human Retinol Binding Protein 4 (RBP4), Transfected HEK293 Cell Culture Supernatant RAY-230-20294-200

Article Name	Recombinant Human Retinol Binding Protein 4 (RBP4), Transfected HEK293 Cell Culture Supernatant
Biozol Catalog Number	RAY-230-20294-200
Supplier Catalog Number	230-20294-200
Alternative Catalog Number	RAY-230-20294-200
Manufacturer	RayBiotech
Category	Proteine/Peptide
Species Reactivity	Human
Product Description	Recombinant human retinol binding protein 4 (RBP 4) overexpression cell culture supernatant, secreted from the serum-free medium of transfected HEK293 cells. Purchase will also include one vial of normal control (Catalog . 230-20001), the culture sup...
Molecular Weight	Recombinant protein product has a calculated molecular mass of 20 kDa. Due to the potential post-translational modifications, it migrates as approximately 25 kDa protein bands in SDS-PAGE under DTT, beta-mercaptoethanol reducing conditions.
Tag	His
Expression System	HEK293 cells

Purity	Unpurified cell culture supernatant. HEK293 cells grown in serum-free medium were transfected with expression vector harboring target gene. The cell culture was harvested with centrifugation to remove cells. The cell culture supernatant containing mammalian cell protease inhibitor cocktail was aliquoted and stored at -80C immediately. The gene overexpression in culture supernatant was confirmed by Western blotting using anti-His tag antibody and/or target-specific antibodies and the culture supernatant derived from HEK293 cells transfected with the empty expression vector was used as a negative control.
Form	Pink liquid
Sequence	Glu19-Leu201
Formula	Cell culture supernatant of transfected HEK293 cells, serum-free.
