| Product Description        | Retinoids are metabolites of vitamin A (retinol) that represent an important group of signaling molecules during vertebrate development and tissue differentiation. Retinoic acid receptors (RARs) include RAR $\alpha$ , RAR $\beta$ and RAR $\gamma$ , each of which has a high a... |
| Buffer                     | DMEM, 2% BSA, 2.5% Glycerol                                                                                                                                                                                                                                                            |
