| Product Description        | FLP is a site-specific recombinases (SSR) from the $\phi$ integrase family, which recognizes distinct 34 bp FRT sites. It has been widely used for generating conditional knockout mice, mediated by FLP/FRT system. Initial use of FLP in mammalian cells reve... |
| Buffer                     | DMEM, 2% BSA, 2.5% Glycerol                                                                                                                                                                                                                                        |
