| Category                   | Kits/Assays                                                                                                                                                                                                                                                   |
| Species Reactivity         | Human                                                                                                                                                                                                                                                         |
| Product Description        | This ELISA kit uses the Competitive-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with Human CLIP. During the reaction, Human CLIP in the sample or standard competes with a fixed amount of Human CLIP on the solid pha... |
| Range                      | 12.35-1000pg/mL                                                                                                                                                                                                                                               |
| Sensitivity                | 4.89pg/mL                                                                                                                                                                                                                                                     |
| Samples                    | Serum,plasma and other biological fluids                                                                                                                                                                                                                      |
| Target                     | CLIP                                                                                                                                                                                                                                                          |
