| Category                   | Kits/Assays                                                                                                                                                                                                                                                   |
| Species Reactivity         | All                                                                                                                                                                                                                                                           |
| Product Description        | This ELISA kit uses the Competitive-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with E1. During the reaction, E1 in the sample or standard competes with a fixed amount of E1 on the solid phase supporter for sites o... |
| Range                      | 125-2000pg/mL                                                                                                                                                                                                                                                 |
| Sensitivity                | 49pg/mL                                                                                                                                                                                                                                                       |
| Samples                    | Serum,plasma and other biological fluids                                                                                                                                                                                                                      |
| Target                     | E1                                                                                                                                                                                                                                                            |
