| Category                   | Kits/Assays                                                                                                                                                                                                                                                   |
| Species Reactivity         | All                                                                                                                                                                                                                                                           |
| Product Description        | This ELISA kit uses the Competitive-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with LTA4. During the reaction, LTA4 in the sample or standard competes with a fixed amount of LTA4 on the solid phase supporter for s... |
| Range                      | 123.5-10000pg/mL                                                                                                                                                                                                                                              |
| Sensitivity                | 50.5pg/mL                                                                                                                                                                                                                                                     |
| Samples                    | Serum,plasma and other biological fluids                                                                                                                                                                                                                      |
| Target                     | LTA4                                                                                                                                                                                                                                                          |
