| Product Description        | HLAE belongs to the HLA class I heavy chain paralogues. This class I molecule is a heterodimer consisting of a heavy chain and a light chain (beta2 microglobulin). The heavy chain is anchored in the membrane. HLAE binds a restricted subset of peptide... |
| Molecular Weight           | 36.2 kDa and 13.7 kDa                                                                                                                                                                                                                                         |
| Tag                        | C-10*His & C-Avi                                                                                                                                                                                                                                              |
