| Product Description        | HLAE belongs to the HLA class I heavy chain paralogues. This class I molecule is a heterodimer consisting of a heavy chain and a light chain (beta2 microglobulin). The heavy chain is anchored in the membrane. HLAE binds a restricted subset of peptide... |
| Molecular Weight           | 36.2 kDa and 13.8 kDa                                                                                                                                                                                                                                         |
| Tag                        | C-10*His                                                                                                                                                                                                                                                      |
| NCBI                       | <a href="#">13747</a>                                                                                                                                                                                                                                         |
| Buffer                     | PBS, 1% BSA, pH7.4                                                                                                                                                                                                                                            |
| Form                       | Powder                                                                                                                                                                                                                                                        |
