| Product Description        | This gene belongs to the human Ly6 gene family and encodes a glycosylphosphatidylinositol (GPI) anchored cell surface protein. The protein plays an important role in T cell physiology, oncogenesis and immunological regulation. The protein is also invo... |
| Molecular Weight           | 35.3 kDa                                                                                                                                                                                                                                                       |
