| Application                | FC                                                                                                                                                                                                  |
| Conjugation                | PE                                                                                                                                                                                                  |
| Product Description        | The C1.18.4 immunoglobulin is useful as an isotype-matched control. The C.1.18.4 immunoglobulin has an unknown binding specificity and is used as an isotype control for mouse IgG2a antibodies.... |
| Clonality                  | Monoclonal                                                                                                                                                                                          |
| Concentration              | 0.2 mg/ml (Please refer to the vial label for the specific concentration.)                                                                                                                          |
| Clone Designation          | [C1.18.4]                                                                                                                                                                                           |
| Isotype                    | IgG2a                                                                                                                                                                                               |
| Buffer                     | 10mM NaH <sub>2</sub> PO <sub>4</sub> , 150mM NaCl, 0.1% Gelatin, 0.09% Sodium azide.                                                                                                               |
| Form                       | Liquid                                                                                                                                                                                              |

Application Notes

\*Optimal dilutions/concentrations should be determined by the researcher. Not tested in other applications.
