| Application                | FC                                                                                                                                                                                           |
| Conjugation                | APC                                                                                                                                                                                          |
| Product Description        | The LTF-2 immunoglobulin is useful as an isotype-matched control. The LTF-2 immunoglobulin has an unknown binding specificity and is used as an isotype control for rat IgG2b antibodies.... |
| Clonality                  | Monoclonal                                                                                                                                                                                   |
| Concentration              | 0.2 mg/ml (Please refer to the vial label for the specific concentration.)                                                                                                                   |
| Clone Designation          | [LTF-2]                                                                                                                                                                                      |
| Isotype                    | IgG2b                                                                                                                                                                                        |
| Buffer                     | 10mM NaH <sub>2</sub> PO <sub>4</sub> , 150mM NaCl, 0.1% Gelatin, 0.09% Sodium azide.                                                                                                        |
| Form                       | Liquid                                                                                                                                                                                       |

Application Notes

\*Optimal dilutions/concentrations should be determined by the researcher. Not tested in other applications.
