| Application                | IHC-P                                                                                                                                                                                                                                                         |
| Species Reactivity         | Human                                                                                                                                                                                                                                                         |
| Immunogen                  | A portion of amino acids 73-96 from the huma protein was used as the immunogen for the Inhibin alpha antibody.                                                                                                                                                |
| Product Description        | It recognizes a 47kDa protein, which is identified as alpha sub-unit of Inhibin. It is a gonadal protein that preferentially suppresses the secretion of pituitary follicle-stimulating hormone (FSH). Inhibin comprises two subunits, Inhibin A and Inhib... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Clone Designation          | [INHA/4265]                                                                                                                                                                                                                                                   |
| UniProt                    | <a href="#">P05111</a>                                                                                                                                                                                                                                        |
| Purity                     | Protein G affinity chromatography                                                                                                                                                                                                                             |

|                    |                                                                                        |
|--------------------|----------------------------------------------------------------------------------------|
| Form               | 0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced) and 0.05% sodium azide             |
| Antibody Type      | Primary Antibody                                                                       |
| Application Dilute | Immunohistochemistry (FFPE): 1-2ug/ml for 30 minutes at RT                             |
| Application Notes  | Optimal dilution of the Inhibin alpha antibody should be determined by the researcher. |
