| Manufacturer               | NSJ Bioreagents                                                                                                                                                                                                                                               |
| Host                       | Mouse                                                                                                                                                                                                                                                         |
| Category                   | Antikörper                                                                                                                                                                                                                                                    |
| Application                | IHC-P                                                                                                                                                                                                                                                         |
| Species Reactivity         | Human                                                                                                                                                                                                                                                         |
| Immunogen                  | Nuclei of HL60 cells were used as the immunogen for the recombinant Nuclear Antigen antibody.                                                                                                                                                                 |
| Product Description        | This MAb is an excellent marker for all nuclei in cells in tissues. It is a part of a new panel of reagents, which recognizes subcellular organelles or compartments of cells. These markers may be useful in identification of these organelles in cells,... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Clone Designation          | [rNM106]                                                                                                                                                                                                                                                      |
| UniProt                    | Not Known                                                                                                                                                                                                                                                     |
| Purity                     | Protein A/G affinity                                                                                                                                                                                                                                          |

|                    |                                                                                                      |
|--------------------|------------------------------------------------------------------------------------------------------|
| Form               | 0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced), 0.05% sodium azide                              |
| Antibody Type      | Primary Antibody                                                                                     |
| Application Dilute | Immunohistochemistry (FFPE): 1-2ug/ml                                                                |
| Application Notes  | Optimal dilution of the recombinant Nuclear Antigen antibody should be determined by the researcher. |
