| Species Reactivity         | Bovine, Canine, Equine, Guinea pig, Human, Mouse, Rat                                                                                                                                                                                                         |
| Immunogen                  | The immunogen is a synthetic peptide directed towards the N terminal region of human KCNA10                                                                                                                                                                   |
| Product Description        | KCNA10 is a member of the potassium channel, voltage-gated, shaker-related subfamily. This member contains six membrane-spanning domains with a shaker-type repeat in the fourth segment. It is specifically regulated by cGMP and postulated to mediate t... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                    |
| Concentration              | 0.5 mg/ml                                                                                                                                                                                                                                                     |
| Molecular Weight           | 58kDa                                                                                                                                                                                                                                                         |
| NCBI                       | <a href="#">3744</a>                                                                                                                                                                                                                                          |
