| Species Reactivity         | Bovine, Canine, Equine, Guinea pig, Human, Mouse, Rabbit, Rat, Yeast, Zebrafish                                                                                                                                                                               |
| Immunogen                  | The immunogen is a synthetic peptide directed towards the N terminal region of human PTPN2                                                                                                                                                                    |
| Product Description        | PTPN2 is a member of the protein tyrosine phosphatase (PTP) family. Members of the PTP family share a highly conserved catalytic motif, which is essential for the catalytic activity. PTPs are known to be signaling molecules that regulate a variety of... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                    |
| Concentration              | 1.0 mg/ml                                                                                                                                                                                                                                                     |
| Molecular Weight           | 39kDa                                                                                                                                                                                                                                                         |
| NCBI                       | <a href="#">5771</a>                                                                                                                                                                                                                                          |
