| Species Reactivity         | Bovine, Canine, Equine, Guinea pig, Human, Mouse, Porcine, Rabbit, Rat                                                                                                                                                                                        |
| Immunogen                  | The immunogen is a synthetic peptide directed towards the C-terminal region of Human EMILIN1                                                                                                                                                                  |
| Product Description        | This gene encodes an extracellular matrix glycoprotein that is characterized by an N-terminal microfibril interface domain, a coiled-coiled alpha-helical domain, a collagenous domain and a C-terminal globular C1q domain. The encoded protein associate... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                    |
| Concentration              | 0.5 mg/ml                                                                                                                                                                                                                                                     |
| Molecular Weight           | 2kDa                                                                                                                                                                                                                                                          |
