| Species Reactivity         | Human                                                                                                                                                                                                                         |
| Product Description        | This is an pre-made gene silencing adenovirus that expresses a shRNA to knockdown human AKT3 gene. The shRNA expression is driven by an U6 promoter. The knockdown of this human gene was validated by qPCR in A549 cells.... |
| Concentration              | 1x10 <sup>10</sup> PFU/ml                                                                                                                                                                                                     |
| Buffer                     | DMEM, 2% BSA, 2.5% Glycerol                                                                                                                                                                                                   |
