Product Datasheet

Recombinant 2019-nCoV S-trimer Protein (C-6His) EBT-EPT040

Article Name	Recombinant 2019-nCoV S-trimer Protein (C-6His)
Biozol Catalog Number	EBT-EPT040
Supplier Catalog Number	EPT040
Alternative Catalog Number	EBT-EPT040-50
Manufacturer	ELK Biotechnology
Category	Proteine/Peptide
Product Description	Recombinant SARS-CoV-2 S-trimer Protein is produced by our Mammalian expression system and the target gene encoding Cys15-Gln1208 is expressed with a 6His tag at the C-terminus....
Molecular Weight	Molecular weight: 136.6kDa. Apparent molecular weight: 170-220kDa, reducing conditions
UniProt	QHD43416.1
Purity	Greater than 95% as determined by reducing SDS-PAGE.

Application Notes

Biological activity: Anti-2019-nCoV S-hIgG1 Antibody (8A5)(CatDA034) can block Human ACE-2-Avi-His (CatCY51) and 2019-nCoV S-trimer Protein-His(CatDRA49) interaction, the IC50 for this effect is 25 ng/ml.. Background: The spike (S) glycoprotein of coronaviruses is known to be essential in the binding of the virus to the host cell at the advent of the infection process. Most notable is severe acute respiratory syndrome (SARS). The severe acute respiratory syndrome-coronavirus (SARS-CoV) spike (S) glycoprotein alone can mediate the membrane fusion required for virus entry and cell fusion. It is also a major immunogen and a target for entry inhibitors. Its been reported that 2019-nCoV can infect the human respiratory epithelial cells through interaction with the human ACE2 receptor. The spike protein is a large type I transmembrane protein containing two subunits, S1 and S2. S1 mainly contains a receptor binding domain (RBD), which is responsible for recognizing the cell surface receptor. S2 contains basic elements needed for the membrane fusion. The S protein plays key parts in the induction of neutralizing-antibody and T-cell responses, as well as protective immunity
