| Product Description        | This Human Target Of The Antiproliferative Antibody 1 (TAPA1) ELISA Kit is a precoated, Sandwich ELISA assay designed to detect and quantify the target analyte in serum, plasma, tissue homogenates and other biological fluids . This product is for Res... |
| Range                      | 0.312-20ng/mL                                                                                                                                                                                                                                                 |
| Sensitivity                | 0.119ng/mL                                                                                                                                                                                                                                                    |
| Samples                    | serum, plasma, tissue homogenates and other biological fluids                                                                                                                                                                                                 |
| Target                     | Human Target Of The Antiproliferative Antibody 1 (TAPA1)                                                                                                                                                                                                      |
| Application Notes          | Assay Length: 3 hours. Experimental Method: Sandwich                                                                                                                                                                                                          |
