| Category                   | Kits/Assays                                                                                                                                                                                                                                                   |
| Species Reactivity         | Human                                                                                                                                                                                                                                                         |
| Product Description        | The GENLISA Human Insulin-Like Growth Factors 2 Receptor (IGF-2R / IGF2R) ELISA includes features like: - Ready to use protocol with break-apart wells for ease of use - Standardisation and High Reproducibility - Lot to Lot Consistency - Accuracy and ... |
| Range                      | 0 - 1000 ng/ml* (May vary. Please confirm)                                                                                                                                                                                                                    |
| Sensitivity                | 30 ng/ml* (May vary. Please confirm)                                                                                                                                                                                                                          |
| Samples                    | Serum, Plasma, Cell Culture Supernatant and other biological samples. Validated for citrated/EDTA Plasma only.                                                                                                                                                |
