| Category                   | Kits/Assays                                                                                                                                                                                                                                                   |
| Species Reactivity         | Human                                                                                                                                                                                                                                                         |
| Product Description        | The GENLISA Human Interleukin 36 Gamma (IL-36-Gamma / IL36gamma) ELISA includes features like: - Ready to use protocol with break-apart wells for ease of use - Standardisation and High Reproducibility - Lot to Lot Consistency - Accuracy and Precision... |
| Range                      | 31.25 - 2000 pg/ml                                                                                                                                                                                                                                            |
| Sensitivity                | 18.75 pg/ml                                                                                                                                                                                                                                                   |
| Samples                    | Serum, Plasma, Cell Culture Supernatant and other biological samples. Validated for citrated/EDTA Plasma only.                                                                                                                                                |
