| Category                   | Kits/Assays                                                                                                                                                                                                                                                      |
| Species Reactivity         | Human                                                                                                                                                                                                                                                            |
| Product Description        | The GENLISA Human MicroRNA 17 Host Gene Protein (MIR17HG) ELISA includes features like: - Ready to use protocol with break-apart wells for ease of use - Standardisation and High Reproducibility - Lot to Lot Consistency - Accuracy and Precision Validated... |
| Range                      | 0.16 - 10 ng/ml                                                                                                                                                                                                                                                  |
| Sensitivity                | 0.057 ng/ml                                                                                                                                                                                                                                                      |
| Samples                    | Serum, Plasma, Cell Culture Supernatant and other biological samples. Validated for citrated/EDTA Plasma only.                                                                                                                                                   |
