| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Product Description        | NcoR2 (nuclear receptor co-repressor) is a transcriptional corepressor that plays an essential role in the regulation of development and metabolism. The interaction of HDAC3 with the deacetylase activation domain (DAD) of NCOR2/SMRT is required for a... |
