| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Application                | ELISA, WB                                                                                                                                                                                                                                                     |
| Product Description        | Location: 14 Amino acids near the N-terminus of SARS Spike protein (1-2). Applications: The peptide is used for blocking the activity of the SARS Spike (NT) antibody. It usually blocks the antibody activity completely in ELISA assays by incubating th... |
| Purity                     | Purified                                                                                                                                                                                                                                                      |
| Form                       | Supplied as a liquid in PBS, pH 7.2, 0.1% BSA, 0.02% sodium azide.                                                                                                                                                                                            |
