| Category                   | Antikörper                                                                                                                                                                                                                                                    |
| Application                | FLISA                                                                                                                                                                                                                                                         |
| Immunogen                  | Human pancreatic trypsin                                                                                                                                                                                                                                      |
| Product Description        | MaxLight(TM) 490 is a new Blue-Green photostable dye conjugate comparable to DyLight(TM)488, Alexa Fluor(TM)488 and offers better labeling efficiency, brighter imaging and increased immunodetection. Absorbance (491nm), Emission (515nm), Extinction Co... |
| Purity                     | Purified by immunoaffinity chromatography.                                                                                                                                                                                                                    |
| Form                       | Supplied as a liquid in PBS, pH 7.2. No preservative added. Labeled with MaxLight(TM)490.                                                                                                                                                                     |
