| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Application                | ELISA                                                                                                                                                                                                                                                         |
| Product Description        | This lectin is a family of tetrameric glycoproteins consisting of combinations of A and B subunits similar in structure to PHA and GSL I. The dominant isolectins in our preparations appear to be B subunit-rich. VVL recognizes preferentially alpha- or... |
| Purity                     | Homogeneous by SDS-PAGE                                                                                                                                                                                                                                       |
| Form                       | Supplied as a lyophilized powder. Reconstitute with 10mM HEPES, pH 8.5, 0.1mM Ca++.                                                                                                                                                                           |
