Purity	Mouse Transferrin was prepared from normal serum by a multi-step process which includes delipidation and selective precipitation followed by extensive dialysis against the buffer stated above. Mouse Transferrin was assayed by immunoelectrophoresis resulted in a single precipitin arc against anti-Mouse Transferrin and anti-Mouse Serum.

Form	Liquid (sterile filtered)
Target	Trf
Application Dilute	ELISA: User Optimized, IHC: User Optimized, WB: User Optimized
Application Notes	<p>Biological Origin: Mouse. Application Notes: Mouse Transferrin is a suitable protein for use as a control reagent in SDS, Western Blotting, and ELISA experiments. For blotting, the expected molecular weight of Mouse Transferrin is approximately 80kDa. Mouse Transferrin, when unopened, is stable at 4 C, but for extended use should be aliquoted and stored at -20 C in its undiluted form. If dilutions of Mouse Transferrin are required, they should be prepared just prior to use and not retained</p>
