| Immunogen                  | Recombinant human full-length TNFRSF8 protein                                                                                                                                                                                                                 |
| Product Description        | Recognizes a single chain glycoprotein of 105/120kDa, identified as CD30/Ki-1. CD30 is synthesized as a 90kDa precursor, which is processed in the Golgi complex into a membrane-bound phosphorylated mature 105/120kDa glycoprotein. In Hodgkin s disease... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
