| Immunogen                  | A partial length recombinant TRIL protein (amino acids 600-811) was used as the immunogen for this antibody.                                                                                                                                                  |
| Product Description        | TRIL is a component of the TLR4 (MIM 603030) complex and is induced in a number of cell types by lipopolysaccharide (LPS). TRIL (TLR4 interactor with leucine-rich repeats) is a component of the TLR4 signaling complex which mediate the innate immune r... |
