## Product Datasheet

### **Phospho-p38 MAPK (Thr180/Tyr182) (Clone: E3) rabbit mAb FITC conjugate, Clone: [P38T180Y182-E3], Rabbit, Monoclonal ABI-12-4145**

|                            |                                                                                                                                                                                                                                                               |

| Category                   | Antikörper                                                                                                                                                                                                                                                    |
| Application                | FACS                                                                                                                                                                                                                                                          |
| Species Reactivity         | Human, Mouse, Rat                                                                                                                                                                                                                                             |
| Immunogen                  | A synthetic phospho-peptide corresponding to residues surrounding Thr180/Tyr182 of human phospho p38 MAPK.                                                                                                                                                    |
| Conjugation                | FITC                                                                                                                                                                                                                                                          |
| Product Description        | P38 mitogen-activated protein kinase (MAPK) is a stress-activated serine/threonine protein kinase and belongs to the MAP kinase superfamily. Various stress stimuli such as ultraviolet light, irradiation, heat shock, proinflammatory cytokines, mitogen... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Clone Designation          | [P38T180Y182-E3]                                                                                                                                                                                                                                              |
| Form                       | Conjugated                                                                                                                                                                                                                                                    |

|                    |                                                                                                                                                                                                                                                                |

| Application Dilute | For flow cytometric staining, the suggested use of this reagent is 5 $\mu\text{L}$ per million cells or 5 $\mu\text{L}$ per 100 $\mu\text{L}$ of staining volume. It is recommended that the reagent be titrated for optimal performance for each application. |
