| Immunogen                  | Recombinant fragment (around aa 44-196) of human CR2 (CD21) protein (exact sequence is proprietary)                                                                                                                                                           |
| Product Description        | Recognizes a protein of 140kDa, which is identified as the complement receptor 2 (CR2) / CD21. This protein is expressed strongly on mature B cells, follicular dendritic cells and weakly on immature thymocytes and T lymphocytes. In B-cell ontogeny, C... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
