| Immunogen                  | A recombinant fragment (around aa 114-263) of human DMD protein (exact sequence is proprietary)                                                                                                                                                               |
| Product Description        | Dystrophin-glycoprotein complex (DGC) connects the F-Actin cytoskeleton on the inner surface of muscle fibers to the surrounding extracellular matrix, through the cell membrane interface. A deficiency in this protein contributes to Duchenne (DMD) and... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
