| Immunogen                  | Recombinant fragment of human KRT20 protein (around aa 196-323) (exact sequence is proprietary)                                                                                                                                                               |
| Product Description        | This MAb recognizes an intermediate filament protein of 46kDa, identified as cytokeratin 20 (KRT20). KRT is abundantly expressed in goblet cells and enterocytes of the gastrointestinal tract. It is a useful marker of pancreatic and colorectal cancer.... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Clone Designation          | [KRT20/1991]                                                                                                                                                                                                                                                  |
