| Immunogen                  | Recombinant human ATRX protein                                                                                                                                                                                                                                |
| Product Description        | ATRX is a member of the Snf2 family of helicase/ATPases, which contribute to the remodeling of the nucleosome structure in an ATP-dependent manner, and facilitate the initiation of transcription and replication. Structurally, ATRX contains a PHD zinc... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
