| Immunogen                  | Recombinant full-length human SULT1E1 protein                                                                                                                                                                                                                 |
| Product Description        | The soluble sulfotransferases contribute to the elimination of xenobiotics, the activation of procarcinogens and the regulation of hormones by catalyzing the sulfate conjugation of these substances. SULT1E1, also known as STE, is a 294 amino acid mem... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Clone Designation          | [CPTC-SULT1E1-1]                                                                                                                                                                                                                                              |
