| Product Description        | This octapeptide beta-Amyloid 16 to 23 was used in exploring the design of potential inhibitors of amyloidogenesis. This peptide is capable of forming thin flakes, while the shortest fibril-forming sequence was found to be the decapeptide b-Amyloid 1... |
| Purity                     | 95%                                                                                                                                                                                                                                                           |
