| Product Description        | Goat anti-mouse IgG is a Rhodamine (TRITC) conjugated secondary antibody which binds to mouse IgG (heavy chain).<br>Tetramethylrhodamine-5-isothiocyanate (TRITC) has Amax = 550 nm, Emax = 570 nm. Antibodies are affinity purified using solid phase mouse... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                      |
| Purity                     | Immunogen affinity purified goat IgG.                                                                                                                                                                                                                           |
| Form                       | Lyophilized                                                                                                                                                                                                                                                     |
| Antibody Type              | Polyclonal Antibody                                                                                                                                                                                                                                             |
| Application Dilute         | The optimal working dilution should be determined by the investigator                                                                                                                                                                                           |

Application Notes

For reconstitution add 1,1 ml of sterile water, Let it stand 30 minutes at room temperature to dissolve, Prepare fresh working dilutions daily
